

Sooner or Later, Everything Falls into the Sea

The sea is a vast and mysterious body of water that covers over 70% of the Earth's surface. It is home to an incredible diversity of life, from tiny plankton to massive whales. The sea has also been a source of inspiration for artists, writers, and musicians for centuries.

One of the most striking things about the sea is its power. The waves can be gentle and calming, or they can be powerful and destructive. The sea can also be a source of danger, with storms, tsunamis, and other hazards that can threaten human life.
