

The Complete Guide To Shoji And Kumiko Patterns Volume 1: Traditional Japanese Latticework For Doors, Windows, And Screens

Shoji and kumiko are traditional Japanese latticework techniques that have been used for centuries to create beautiful and functional doors, windows, and screens. Shoji are sliding doors or screens made of translucent paper, while kumiko are the decorative latticework that is often used to adorn them. Together, these two techniques create a unique and elegant aesthetic that is synonymous with traditional Japanese architecture.

This book is the first in a two-volume series that provides a comprehensive guide to these techniques. Volume 1 covers the basic principles of shoji and kumiko, including the different types of wood, tools, and joinery techniques that are used. It also provides step-by-step instructions for

creating a variety of different shoji and kumiko patterns, from simple geometric designs to more complex and intricate ones.

Volume 2 of this series will cover more advanced topics, such as how to create curved and three-dimensional kumiko patterns, and how to use shoji and kumiko in different architectural applications. However, Volume 1 provides a solid foundation for anyone who is interested in learning these traditional Japanese techniques.

Whether you are a professional woodworker or a hobbyist, this book is a valuable resource that will help you to create beautiful and functional shoji and kumiko projects for your home or garden.
